

CORONA VIRUS

FOOD SAFETY

→ Wash your hands frequently...

- Upon arriving to work and after returning from a break
- After using your cell phone, touching your face, blowing your nose, tying your shoes, etc.
- After eating, returning from the bathroom, sweeping, mopping, cleaning, and sanitizing

→ Routinely clean and disinfect throughout the day

- All frequently touched surfaces and all food contact surfaces

**Wash and rinse off visible dirt or debris before sanitizing. Sanitizers work better on clean surfaces.*

→ Clean and disinfect shared work phones before and after use

- When possible do not use other people's phones or share phones

→ Consider increasing air circulation by keeping a door or window open

→ HOW TO put on and adjust face masks:

- Wash your hands before putting on the face mask
- Hold the mask by the straps, do not touch the front of the mask
- Make sure the mask covers both your nose and mouth
- Be careful not to touch your eyes, nose, and mouth
- Adjust by holding straps. If you must touch the front of the mask, wash hands immediately after

→ HOW TO remove face masks:

- Remove by touching only the straps, not the front of the mask
- Be careful not to touch your eyes, nose, and mouth
- Wash your hands immediately after removing the face mask
- If reusable, wash after each use (after each shift)

→ Stay at home if you are sick

- Notify managers as soon as you feel ANY symptoms of being or possibly getting sick
- Remember the time to work while “under the weather” is over

→ Stay at home if you live with someone with COVID-19 or with matching symptoms

- Notify managers as soon as you find out
- Notify managers if you learn you have been exposed in any way
